Reference: DoD CIO Memorandum, The Department of Defense Information Enterprise Architecture, May 7, 2010

Subject: DoD Information Enterprise Architecture, Version 1.2

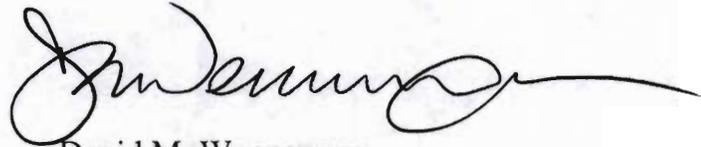

The Department of Defense (DoD) Information Enterprise Architecture (IEA) (ref) version 1.1 unified the concepts embedded in the Department's net-centric strategies, highlighted key principles, rules and constraints with which all DoD investments must comply and provided guidance on applying and complying with the DoD IEA.

DoD IEA version 1.2 incorporates an Appendix G to describe what each program or initiative implementing a system, service, or solution must do to comply with the DoD Enterprise Architecture (EA), with emphasis on compliance with Mandatory Core Designated DoD Enterprise Services. The remainder of the document remains unchanged, with the exception of: (1) one new Global Principle; (2) one new Data and Services Deployment Business Rule; and (3) Appendix D and E edits to demonstrate the compliance requirements for Appendix G.

Effective immediately, DoD IEA version 1.2 will be used in lieu of version 1.1. The DoD IEA version 1.2 is the single document establishing requirements for Compliance with the Department's net-centric strategies.

My action officer for this effort is Mr. Terry Hagle (703-607-0235; terry.hagle@osd.mil). Please refer your questions/comments concerning Version 1.2 to Mr. Hagle.

David M. Wennergren
DoD Deputy Chief Information Officer
