

# DoD CYBER WORKFORCE UPDATE

UNCLASSIFIED // FOR OFFICIAL USE ONLY

February 2019

## DoD CIO Testifies Before House Armed Services Subcommittee

On Tuesday, February 26, DoD CIO Dana Deasy testified before the House Armed Services Subcommittee on Intelligence and Emerging Threats and Capabilities on DoD's Information Technology, Cybersecurity, and Information Assurance. In his [opening statement](#) to the subcommittee, Mr. Deasy highlighted the Joint Enterprise Defense Infrastructure and the Joint Artificial Intelligence Center to underscore the importance of the Department's cloud and AI strategies.

Mr. Deasy's [remarks](#) build on his January testimony before the Senate Armed Services Subcommittee on Cybersecurity. In both hearings, Mr. Deasy emphasized how critical the cyber workforce efforts – particularly the Cyber Excepted Service – are to mission success.

“This is a new way of doing business. And more importantly, the (personnel and readiness) organization in the respective military services need to train up at a faster rate the people that they need to bring on board to actually accelerate the CES,” – Dana Deasy

Accelerating CES will require enhanced coordination with our partners. Our team looks forward to working across the enterprise to achieve mission success.
