### DoD CIO's Role & Responsibilities

1. Develop a cohesive ICAM strategy and promote a unified vision for ICAM across the DoD
2. Establish enterprise ICAM architecture
3. Prioritize ICAM investments, and approve ICAM-related IT budgets
4. Establish policy; measure and report policy implementation
5. Oversee stakeholder collaboration and requirements management

### Mission User Benefits
- Support access to DoD mission-essential systems in federated and degraded environments
- Serves as critical component of Joint All-Domain Command and Control (JADC2)

### Mission Partner Benefits
- Provide secure access to DoD resources without needing a CAC
- Support information sharing with allied, coalition, federal, & industry partners

### Business User Benefits
- Simplify authentication through use of a single credential to access multiple applications
- Streamline access management through automated account creation and updates

### Beneficiary Benefits
- Strengthen data protection and user-friendly, secure sign-on
- Simplify the log-in process

### Zero Trust Enablement:
Provide the policies and prioritization needed to deploy the ICAM capabilities necessary to implement Zero Trust principles

### Enterprise Shared Services:
Drive enterprise ICAM solutions that meet mission requirements, create efficiency, reduce cost, and enhance the DoD’s security posture

### Governance:
Engage stakeholders and increase the efficiency and effectiveness of the decision making needed to address gaps and oversee delivery of ICAM capabilities

### Accelerated Adoption:
Educate stakeholders and activate organizational change to drive adoption of enterprise solutions and capabilities

### Continuous Innovation:
Adapt to industry standards and partner with academia to inspire creative solutions

### Additional Information:
Additional information about the ICAM Strategy and ICAM Reference Design can be found on the [https://dodcio.defense.gov/Library/](https://dodcio.defense.gov/Library/).
