Don't display personal information on a social media account and update privacy settings periodically. Disable geo-tagging on social media accounts.

Don't use a combination password that is obvious such as the name of your pet or birthdate.

Don't fall victim to a phishing scam. If it looks suspicious, don't risk opening an email or clicking on a link.

Updated security software will prevent attacks from manipulating software vulnerabilities.

Do not leave cell phones, laptops, tablets etc. unattended in a public place to prevent theft. Always keep devices locked when not in use.

Always change the username and password to something you have created and not a factory default.
